

Poudre High School

PHS's Gifted and Talented Program acknowledges the advanced student's personal, social, and academic needs and supports growth and achievement with differentiated learning in classroom curriculum, with extracurricular opportunities, and community-based experiences. PHS's GT coordinator and staff provide a responsive climate and relevant learning experiences that foster intellectual curiosity and critical and creative thinking for high student achievement. We provide opportunities for exploration in areas of personal interest. PHS's GT Program is designed to teach students how to recognize and use their potential and to become successful, self-directed learners.

Programming Opportunities for Gifted Learners

Content extensions: Advance courses (IB, AP, and Concurrent Enrollment College Courses) offer curriculum above and beyond the traditional classroom. Some of these courses offer dual credit (both high school and college/university credit). Check out the PHS Curriculum Guide on the PHS Counselor Webpage and/or institution of higher learning of interest for more information.

Differentiation for gifted in regular classroom: All teachers in the school implement choice in process and product for many of the courses offered. Tiered lessons are common in all classrooms.

Acceleration opportunities: Gifted Students select accelerated courses based on their interests.

Site-Based Gifted and Talented Services Overview

In addition, Concurrent Enrollment College courses (at FRCC) are available for students who wish to continue in any given subject once they have exhausted all options within the school.

Structure (grouping of students): Students are grouped with intellectual peers in chosen classes (Pathway, IB, AP, CE), in the students' areas of strength. Gifted students also have opportunities to learn with other gifted students in after-school and during school enrichment opportunities when their interests overlap with other gifted learners' interests.
