

Progress Monitoring Tools

Progress monitoring can be described as an evidence-based practice that is utilized to assess students' academic performance and evaluate the effectiveness of instruction/intervention (Fuchs & Fuchs, 2008). Progress monitoring is composed of administering brief assessments to measure student progress and takes place on a regular basis (weekly or monthly). The purpose of progress monitoring is to determine whether or not students are responding successfully to instruction/intervention, which makes this practice an essential feature of response to intervention (Stecker, Fuchs, & Fuchs, 2008).

- 5 & 6 minute Fluency
- Accelerated Math
- Access Skills: Anecdotal Records, Data Sheets, Rubrics
- ADL: 10-1, 20-1, 30-1
- AIMSWEB: Behavior, Math, Reading, Writing
- Anecdotal Records
- Attendance Reports
- Behavior Data Sheets; Rubrics, Tally Sheets
- BRI: Comprehension, Fluency, Listening, Word Identification
- Career Development
- Community Access
- Curriculum Based Measurement
- Daily Living Skills
- Data Collection Sheet
- Decision Making/Problem Solving Data Collection
- DIBELS
- Discipline Report
- Early Learning Concepts
- EnVision Assessments
- Flash Cards
- Flashmaster Fluency
- Functional Academics
- General Words Orally
- Grade Reports
- Hearing Data Collection
