

Data Informing Long-Range Planning

Poudre School District | District Advisory Board Meeting
November 6, 2023

Challenges to Address

Challenges to Address

- **Challenges**
 - Enrollment in PSD schools is declining as birth rates decline state and nationwide
 - Declining enrollment results in less funding for schools
- **To address challenges associated with declining enrollment, through the long range planning process our objectives are to:**
 - Ensure elementary schools have enrollments higher than approximately 400 students and middle schools have enrollments higher than approximately 700 students
 - Find a new home for Cooper Home, Community Connections, Transition Pathways
 - Maximize infrastructure investments in our schools
 - Replace Timnath Elementary School and relieve enrollment-related pressure at Timnath Middle High School
 - Establish minimum staffing levels at each school
 - Improve sustainability of alternative programs
 - Evaluate program alignment across feeders

Demographic Data

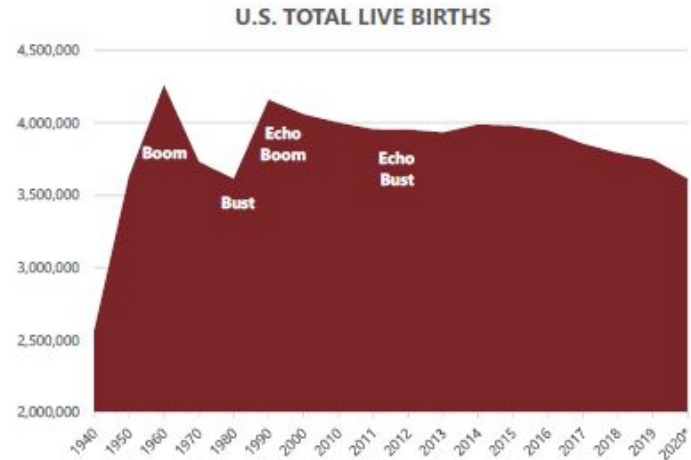

Demographic Data

- **U.S. Population Fertility Rates and Live Births**
- **900,000 fewer children born in the U.S. over the last five years.**

Local and National Population Trends

- **Fertility rates have been in decline locally and nationally. The fertility rate measures how many children are likely to be born in a population.**
 - For a population to replace itself, the fertility rate must be a minimum of 2.1 births per person of reproductive age.
 - In PSD boundaries, this rate is 1.09 births per person of reproductive age, and has been declining since 2000.
- **Birth rates have been in decline in Larimer County as well as in PSD district boundaries.**
 - Declines began in 2016 and became more pronounced starting in 2020.
 - Birth rates are projected to continue declining in the years to come.
- **Kindergarten enrollment is also declining across Larimer County and within district boundaries.**
 - PSD typically graduates classes of approximately 2,000 12th graders each year.
 - As of preliminary October Count, the current entering kindergarten class has 1,599 students.
 - This significant discrepancy is evidence of the school-aged population decline in our region.

Demographic Data

Demographic Data

- PSD Boundary Area Residential Fertility and Birth Rates

Females by Age Group	2000 Population	2000 In-District Births	2000 Birth Rate	Change from Prior Decade
15-19	7,163	141	0.020	--
20-24	9,991	447	0.045	--
25-29	6,238	592	0.095	--
30-34	5,284	510	0.097	--
35-39	5,824	234	0.040	--
40-44	6,481	54	0.008	--
Total Fertility Rate			1.52	

Females by Age Group	2010 Population	2010 In-District Births	2010 Birth Rate	Change from Prior Decade
15-19	7,849	119	0.015	-23.0%
20-24	11,844	334	0.028	-37.0%
25-29	7,303	592	0.081	-14.6%
30-34	6,076	680	0.112	16.0%
35-39	5,574	270	0.048	20.6%
40-44	5,230	73	0.014	67.5%
Total Fertility Rate			1.49	-1.8%

Females by Age Group	2020 Population (Estimate)	2020 In-District Births	2020 Birth Rate	Change from Prior Decade
15-19	8,168	43	0.005	-65.3%
20-24	12,931	235	0.018	-35.6%
25-29	8,897	446	0.050	-38.2%
30-34	6,780	587	0.087	-22.6%
35-39	6,698	336	0.050	3.6%
40-44	7,288	62	0.009	-39.1%
Total Fertility Rate			1.09	-26.7%

Fertility rate represents the number of births per individual of reproductive age in a population.

For a population to maintain is current level, this rate must be 2.1

Red cell shading denotes a decrease from the prior decade

Green cell shading denotes an increase from the prior decade

Source: Flo Analytics, U.S. Census Data

Local Population Forecast Trends

- **Looking to future decades, Larimer County will have an increasingly aging population.**
 - This means the number of school-aged children will lag the growth in populations of older age demographics.
- **Total population growth, including among school-aged children, is anticipated to continue in Timnath and Wellington.**
 - Timnath and Wellington have experienced the greatest total population growth in the region over the last decade.
 - Timnath grew by 26.4%
 - Wellington grew by 5.8%
 - By comparison, the City of Fort Collins grew by 1.8%

Notes on this data:

- Cooperative Strategies report was generated in May 2022.
- The data for 2022-23 school year used here was a projection at that time.
- The Cooperative Strategies report did not include analysis of the 2027-28 school year.
- PSD projections team has since developed projections for 2027-28 based current available data.

Demographic Data

- **Cooperative Strategies low enrollment projections for PSD in 2026-27 school year**
 - **14.78% decline anticipated between 2022-23 and 2026-27 school year***
- Projections data from the PSD IT projections team and Cooperative Strategies is posted on the PSD website. This includes projections by school.

Charter School Enrollment Trends

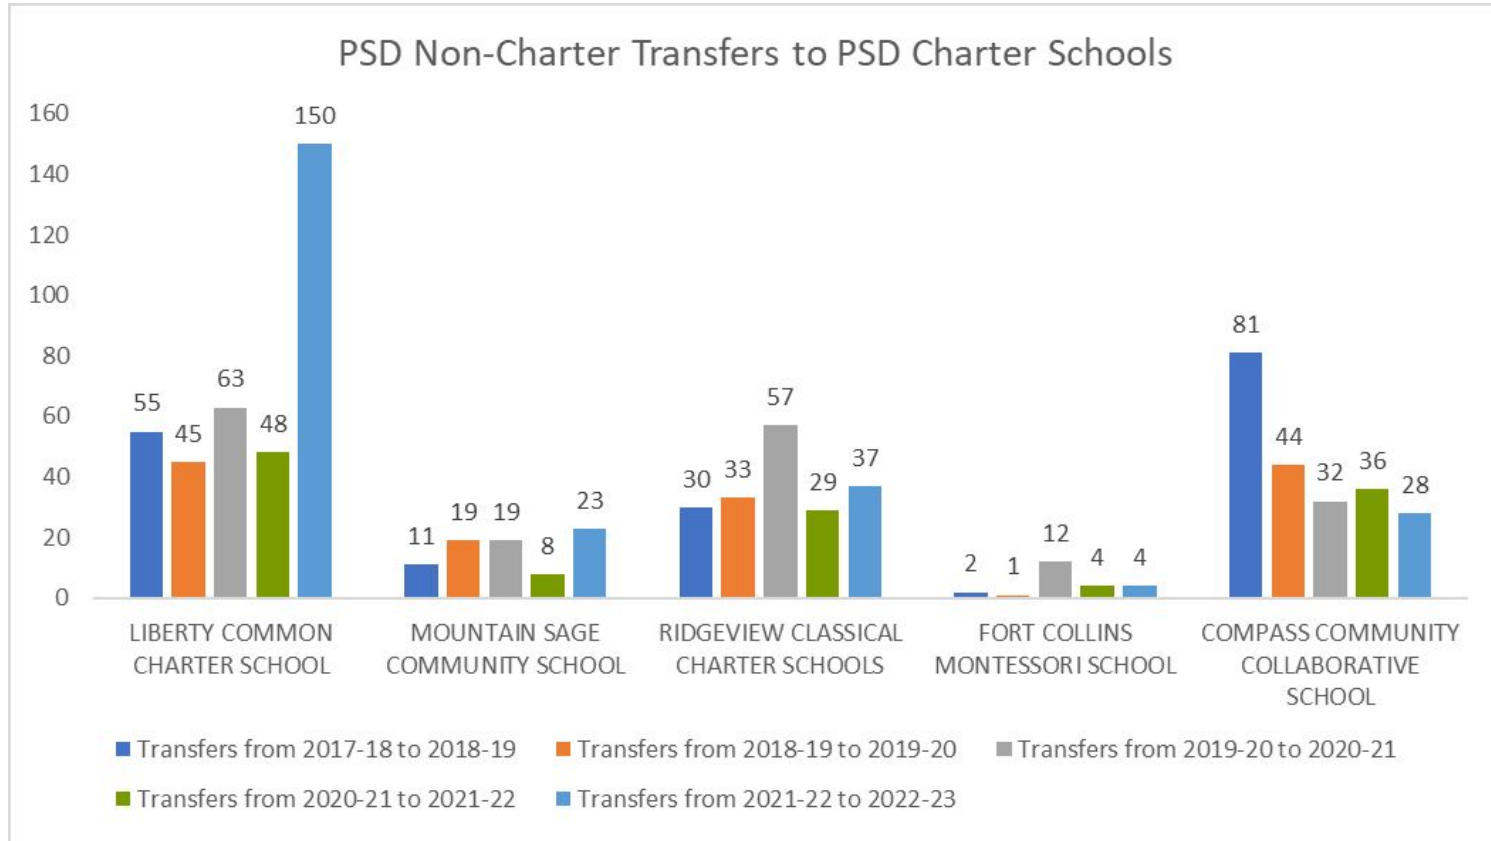

- **Over the last three years, enrollment in PSD-authorized charters has increased by 293 students.**
 - Not all of these students come from PSD schools.
- **In 2022, the number of transfers from PSD-authorized charter schools back to PSD non-charter schools increased.**
 - The number of transfers back to PSD non-charter schools exceeded the number of transfers to PSD charter schools.
- **In 2022, 1,060 students choiced into PSD.**
 - This is an increase of 255 students over 2021.
 - In 2022, the number of students choosing out of PSD schools decreased by 238 students.

October Count Trend

- **October Count is the state's official count of student enrollment.**
 - It includes PSD charter schools.
 - Data for 2023-24 is preliminary.

	2016-17	2017-18	2018-19	2019-20	2020-21	2021-22	2022-23	2023-24*
PSD Enrollment Less Charters and Other Variably Funded Students	26,487	26,859	27,115	27,291	26,822	26,473	26,206	25,964
PSD October Count Including Charters and Other Variably Funded Students	29,682	30,019	30,518	30,828	29,490	30,010	30,170	TBD

Current Enrollment

- **PSD's current enrollment K-12, not including PSD charters, as of the preliminary October Count 2023 is as follows:**
 - **25,964 students (K-12)**
 - This is 298 students more than PSD projected.
- **Enrollment by level**
 - **Elementary: 10,589 students**
 - This is 80 students fewer than projected.
 - 1,599 are kindergarteners.
 - **Middle: 4,637 students**
 - This is 134 students more than projected.
 - **High and Middle-High: 10,738 students**
 - This is 244 students more than projected.
 - 2,269 are high school seniors.

Enrollment and Current Empty Seats

- **1500-3000 elementary school seats without students to fill them**
 - This is approximately equivalent to three to six fully enrolled elementary schools
- **1500 middle school seats without students to fill them**
 - This is approximately equivalent to two fully enrolled middle schools
- **Moving boundaries also does not solve this problem, it just creates more smaller schools, which are not financially sustainable**
- **To solve the enrollment challenge we face, we must reconsider program placement in our buildings and explore boundary modifications to consolidate schools**

Building Capacity

Building Capacity

- **PSD uses two calculations to determine the capacity of its school buildings:**
 - **Room Index Capacity (RIC):** This is a uniform calculation that is determined by counting the number of teaching spaces available in a building and multiplying that number by 25 students at the elementary level and 30 students at the secondary level. This calculation does not factor in gyms, art or music rooms, or computer labs.
 - **National Standard Capacity (NSC):** This calculation is based on national norms for determining school building capacity. It begins with the Room Index Capacity calculation and then applies a percentage usage factor designed to account for the ways that schools actually operate (i.e. to ensure space is available for planning time, small group work, teaching spaces with unique programming needs, etc.).
 - The usage factors by level are as follows:
 - Elementary: 80%
 - Middle School: 75%
 - High School: 85%
 - Middle-High School: 80%

Financial Information

How Schools Are Funded in Colorado

- **The legislature sets base per pupil funding each year as part of the state budget process and the School Finance Act**
 - **The total amount of funding each district receives is called “total program” which includes the state and local share.**
 - Local share is generated through property taxes, locally approved ballot measures like mills and bonds, and specific ownership taxes (i.e. for vehicles)
 - **Changes in Colorado’s taxation structures, including recent tax increases based on assessed valuation and measures like Proposition HH and others, do not result in significant funding windfalls for school districts.**
 - In lieu of receiving additional funds from higher tax collections at the state level, school districts will proportionally receive less funding from the state level, meaning more of school district funding will come from the local level.
- ***PSD is a floor-funded district meaning it does not receive additional financial support for cost of living, personnel, or district size from the state.***

How Schools Are Funded in Colorado

- **Colorado's school funding is allocated based on five-year enrollment averages.**
 - Enrollment declines result in progressively less funding to districts over time.
- **Approximately 85% of PSD's budget supports salaries and approximately 15% supports the operations of the district.**
 - Only \$800,000 of the district's annual budget is dedicated to capital projects and maintenance.
 - This is insufficient funding to address our building needs.

Central Office Costs

- **PSD's Central Office is staffed at a considerably lower level compared to other districts on the Front Range.**
- **There have not been significant staffing additions made at the Central Office in recent years**
 - New positions are typically added through the budget development process (BDT).
 - Positions added outside of the BDT process are typically cost-neutral reorganizations.
 - In some cases, modifications to titles and job responsibilities have been made.
 - Positions are also often added when the district receives dedicated funds, such as grants, to be used for staffing. The duration of such positions is limited to the length of the grant term.

How Schools Are Funded in PSD

- **Schools receive a student-based budget (SBB) based on enrollment counts and factors.**
- **Schools also have school-based staffing positions, not included in SBB, that are funded centrally. These include positions in:**
 - Integrated Services
 - Language, Culture, and Equity
 - Security
 - Technology
 - Student Services
 - Athletics
 - Early Childhood
 - Principals and Assistant Principals

How Schools Are Funded in PSD

- **Additional centrally-funded supports that are provided to schools but not included in SBB are:**
 - Assessment and Research
 - Curriculum and Instruction
 - Facilities
 - Child Nutrition
 - Professional Development
 - Technology
 - Transportation
 - Human Resources and Finance
 - Communications
 - Partnerships and Volunteers
 - Legal
 - Administration
 - Operational costs for buildings

Enrollment Projections

Funding Per Pupil by School

- **Funding allocated to each PSD school per pupil is based on a variety of factors including:**
 - At-risk
 - Levels of support
 - Gifted and talented
- **To ensure that PSD provides access to all aspects of a high-quality education at all schools (i.e. specials, electives, counseling), it is necessary to subsidize school budgets as enrollment declines.**
 - A size factor is therefore added to the school budgets of those schools with lower enrollments.

How Schools Are Funded in PSD

- **Since PSD uses a Student-Based Budgeting model (SBB) and because Colorado funds schools on a per-pupil basis, declining enrollment can result in fewer programmatic offerings in schools.**
 - Schools with larger enrollments can offer diverse program and course options to students, including art, music, physical education, electives, among others.
 - As we address the enrollment challenges that we face, our objective is to ensure that schools have sufficient enrollment to continue offering robust programming and course options to all students.

Subsidies to School Budgets by School

- **Some schools have enrollments that are so low that the student-based budgeting model cannot be used.**
- **In these instances, a zero-based budgeting model is used.**
 - These schools typically receive higher per pupil allocations as a result.
 - Schools funded using the zero-based budget model include: the Mountain Schools, Centennial, Futures Lab, Poudre Global Academy (PGA), Options, Polaris, and Poudre Community Academy (PCA)

Funding Per Pupil by School

- **The highest rates of funding per pupil in the district are:**
 - Mountain Schools: \$13,686
 - Centennial High School: \$11,960
 - Poudre Global Academy: \$10,106
 - Poudre Community Academy: \$8,362
 - Irish Elementary School: \$8,182
 - Polaris Expeditionary Learning: \$7,760
- **The lowest rates of funding per pupil in the district are:**
 - Fort Collins High School: \$5,479
 - Fossil Ridge High School: \$5,415
 - Rocky Mountain High School: \$5,575
 - Kinard Middle School: \$5,594

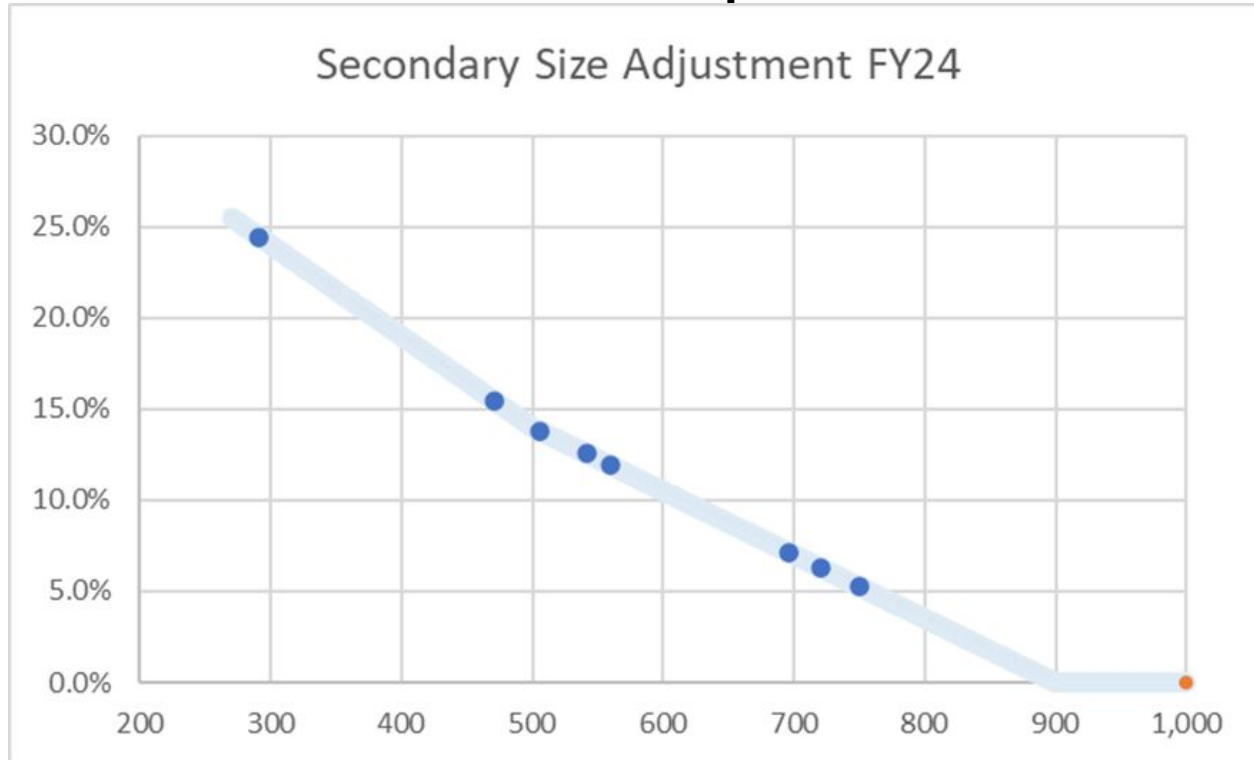

Enrollment Decline and Impact to School Budgets

- **As enrollment declines, PSD subsidizes the student-based budgeting allocation that schools receive.**

Enrollment Decline and Impact to School Budgets

Note: Comprehensive high schools do not receive a size adjustment (PHS, FCHS, FRHS, RMHS); TMHS and WMHS received a blended size adjustment as they grow into 11th and 12th grades.

Subsidies and Enrollment

- **For PSD to be in a position to offer a wide array of programs, classes, and services within a school while minimizing the need to subsidize its budget, enrollment must be:**
 - 400 students or greater at the elementary school level
 - 700 students or greater at the middle school level
- **The only schools that currently have sufficient enrollment to mitigate the need for a size adjustment are:**
 - Bethke Elementary School
 - Eyestone Elementary School
 - Fort Collins High School
 - Fossil Ridge High School
 - Poudre High School
 - Rocky Mountain High School

Subsidies to School Budgets by School

- **The highest rates of subsidization in PSD schools are:**
 - Cache la Poudre Middle School: 24%
 - Blevins Middle School: 15%
 - Preston Middle School: 14%
 - Boltz Middle School: 13%
 - Lincoln Middle School: 12%
 - Putnam Elementary School: 12%
- The program placement changes proposed by the district in October 2023 included three schools that are funded via the zero-based budgeting model and two funded via the student-based budget model.
 - Polaris, PGA, and Centennial are all zero-based budgets, meaning they receive more funding per student than other schools.
 - Blevins and Olander are student-based budgets and are subsidized at 13% and 7% respectively.

McKinstry Facilities Data

Maintaining and Improving Our Facilities

- **Maintaining and improving our facilities and building new ones will require multi-million dollar capital investments.**
 - PSD's current annual capital budget is less than \$800,000.
 - This capital budget does not meet district needs. For example, replacing the chiller at FCHS costs more than \$1 million alone.
- **To fund these ongoing capital maintenance and improvements in our community's facilities, voter support will be needed in the near future.**

Maintaining and Improving Our Facilities

- **To best articulate our facilities improvement needs in the coming decade, PSD has hired an independent third-party, McKinstry Engineering, LLC.**
- **McKinstry is evaluating PSD systems, including their life and replacement cycles, and the structural and financial feasibility of making changes to them in four studies. These studies include:**
 - Air conditioning feasibility study
 - Facilities Condition Assessment (FCA) study
 - Retro-commissioning study
 - Solar feasibility study

Maintaining and Improving Our Facilities

- **PSD facilities are in need of large-scale ongoing improvements including:**
 - Estimated \$199 million to \$268 million in air conditioning installation in those 33 school buildings without it over the next 10 years.
 - Estimated \$600 million for mechanical systems replacements over the next 10 years.
 - This \$600 million is an estimate based on the \$362 million base cost of systems, plus estimated additional costs including abatement, design, and other project costs as well as inflation. These additional costs are estimated to add approximately 70% to the base cost.
 - The facilities condition assessment does not include items like pavement/hard surface maintenance and replacement, playgrounds, fields, irrigation, and furniture, fixtures and equipment.

Maintaining and Improving Our Facilities

- **Some regions of the district are continuing to grow and will likely require new schools to be built in the future.**
 - Timnath will likely need additional school space for grades K-8, which could cost approximately \$80-\$100 million to build.
 - PSD can adjust some boundaries to alleviate crowding, but doing so will not solve this challenge in the long term.
 - Current Timnath Elementary School may need to be decommissioned due to its age and condition in the future.
 - The northeastern region of the district may need additional school space for grades K-5.

Maintaining and Improving Our Facilities

- **Renovations to accommodate new programming and the expansion of programming are needed in some schools**
 - To expand Universal PreK, additional renovated space in elementary school buildings is needed.
 - To expand career and technical education options, additional CTE spaces are needed.

Next Steps

Next Steps

- **An external facilitator will be selected via a Request for Proposal (RFP) in Fall 2023**
- **A Facilities Planning Steering Committee will be formed:**
 - Members will be selected by application and will include parents/guardians and staff.
 - Student and community voice will also be an important part of this process.
 - The committee will engage the community and gather feedback in listening sessions from parents/guardians, staff, and students district-wide.

Next Steps

- **The Facilities Planning Steering Committee will:**
 - Develop a recommendation for alternative program placement and boundary adjustments/school consolidations to be presented to the superintendent and Cabinet that addresses these objectives:
 - Ensure elementary schools have enrollments higher than approximately 400 students and middle schools have enrollments higher than approximately 700 students
 - Find a new home for Cooper Home, Community Connections, Transition Pathways
 - Maximize infrastructure investments in our schools
 - Decommission Timnath Elementary School and relieve enrollment-related pressure at Timnath Middle High School
 - Establish minimum staffing levels at each school
 - Improve sustainability of alternative programs
 - Evaluate program alignment across feeders

Next Steps

- **The Facilities Planning Steering Committee will:**
 - The recommendation will then be shared with the Board of Education and the public and a determination will be made about what changes to implement.
 - The recommendation will be developed and shared by May 2024.
- **Changes identified to program placement and boundaries will be implemented no earlier than the 2025-26 school year.**

Next Steps

- **A long-range planning data webpage has been created on the PSD website**
 - All of the data discussed in this presentation is available on the webpage
 - A link to this webpage will be sent to the entire district community
- **Updates**
 - As the work on long-range planning moves forward, regular updates will be posted to the webpage and will be shared with the community

Questions/Discussion
