

ECF - ENERGY CONSERVATION

Poudre School District shall conserve energy and natural resources consistent with the requirements of its academic and extracurricular programs and within the bounds of sound financial management. The District shall provide leadership in developing a realistic energy use ethic and awareness of energy needs, and their associated costs.

The superintendent, or designee, shall develop short- and long-range strategies for implementing, monitoring, and evaluating the District's energy conservation and efficiency program.

The superintendent, or designee, shall maintain accurate records of energy consumption and associated costs.

Energy efficiency shall be a major consideration in the new construction or renovation of District facilities.

Adopted by Board: September 8, 1996

Revised by Superintendent: January 19, 2009
