

JC - SCHOOL ATTENDANCE AREAS

Attendance areas for each District school shall be recommended by district staff and approved by the superintendent, based on geography and student population projections.

In establishing school boundaries, consideration shall be given to the densities of students in an area in relation to the relative capacities of the schools, the equalization of enrollments in classrooms, choice/open enrollments, and efficient use of transportation resources.

District staff shall review enrollment trends on a regular basis and recommend attendance area/boundary adjustments as needed. District guidelines on building capacities will be used in the planning process. District staff shall provide for and obtain community feedback on proposed boundary changes and include a summary of those comments along with their recommendations to the superintendent.

The designated attendance area of a student shall be based on the student's residence as determined by application of Colorado law.
