Questions & Answers - 1

Solicitation   20-680-003 - District-Wide Intercom System
Buying Organization   Poudre School District

No	Question/Answer	Question Date
Q1	**Question: 20-680-003 - District-Wide Intercom System** What phone system is Poudre using? **Answer:** Avaya phone system	10/25/2019
Q2	**Question: 20-680-003 - District-Wide Intercom System** What approximate number of devices will be replaced in a 12 month period? **Answer:** We are assuming 'device' means 'intercom system.' All 50+ sites need intercom systems replaced; we would like the work completed as efficiently as possible. Because of the intrusive nature of needing to rewire each classroom (or some other creative solution), most of the work would need to be done in the summers. Therefore, we anticipate the project taking 3-5 years. If 'device' means each subcomponent of a potential intercom system, we wouldn't be able to predict quantities until determinations of all potential options were made.	10/25/2019
Q3	**Question: 20-680-003 - District-Wide Intercom System** How many desktop computers would you want to send pop-up notifications to? **Answer:** The District has approximately 5,000 desktops and 30,000 laptops that could fall into this category.	10/25/2019
Q4	**Question: Timeline question** Is there a timeline for the District-Wide Intercom System installation that should be taken into account when responding to the RFP? **Answer:** We would like to start the project this summer with a proposed 3-5-year rollout.	10/28/2019
Q5	**Question: Classrooms Per Site** It states there are Approximately 1800 classrooms in 50 sites, is it possible to get a per site room breakdown, to more accurately provide pricing? **Answer:** There are approximately 30 classrooms per elementary school, 45 classrooms per middle school and 75 classrooms per high school. This is an approximation of classrooms and does not take into account offices, gyms, lunchrooms, auditoriums, etc. that will have similar speaker needs.	10/29/2019
Q6	**Question: 1.2.1.5 Voice Amplification** Is PSD looking at an RF amplification system and are they looking to tie into the classroom projectors? **Answer:** The District is looking for voice amplification for the teachers via microphone or pendant as a requirement. Tying in the other classroom devices (projectors, TV's, laptops) would be an optional enhancement. Provide pricing for the optional enhancements.	10/29/2019

No	Question/Answer	Question Date
Q7	**Question: 2.2.2.2 Classroom Control** Is the goal to tie via HDMI off of a local laptop for local interface? **Answer:** The goal is to have some interface to control classroom devices from a control panel at the desk or wall. We do not have laptops set aside for any control functions. The teacher laptop is not an option since it is portable and may not always be in the room.	10/29/2019
Q8	**Question: 3.2.2.12 Two Way Radio** What Manufacturer does PSD support for Radio Equipment. E.g., Motorola? **Answer:** Hytera UHF radios that operate over Poudre School District licensed UHF frequencies	10/29/2019
